Main Page Discussion Read View source View history Search Esolang https://esolang.org/wiki/Main_Page Create account Log in

Welcome to **Esolang**, the esoteric programming languages wiki!

Why not join us on IRC?

This wiki is dedicated to the fostering and documentation of programming languages designed to be unique, difficult to program in, or just plain weird.

For readers

You'll probably want to find out what on earth an [esoteric programming language](#) is in the first place.

Then, you might want to explore the [complete list of languages](#), or find something more specific with the [categories](#).

You could also visit the [joke language list](#), which lists languages that can't even be programmed in.

Failing that, you could take a look at a [random language](#).

You could also take a look at the [list of special pages](#).

After getting bored, you could visit the [Sandbox](#) and have fun.

Featured language

Thue is an esoteric programming language based around the idea of a "semi-Thue system": a system which specifies strings that can be rewritten to certain other strings; a program is simply a list of search strings, and possible replacements for them. As a [nondeterministic](#) language, a program has the potential to halt if there is some way to reach an end state via applying replacements, even if rules such as "always apply the first replacement" would lead to an infinite loop. No data storage is necessary, apart from a single string that holds the entire state of the running program, although this often causes programs to run slowly due to delays in communicating information from one part of the string to another. ([more...](#))

Previously featured: [Funciton](#) · [Brainfuck](#) · [Deadfish](#) · [Emmental](#) · [more...](#)

For creators

If you've just created a language, you can create an article for it by typing its name into the search box, assuming the name is not already taken, but be sure to take a look at the [help guide](#) first. Then you should add it to the [language list](#) (or the [joke language list](#), as appropriate). **DON'T** create pages with the [Esolang](#): prefix for your esolang because that prefix is for general information about the wiki.

If you haven't got that far yet, take a look at the [list of ideas](#) for inspiration.

Otherwise, you could help out with a [work in progress](#).

Meta

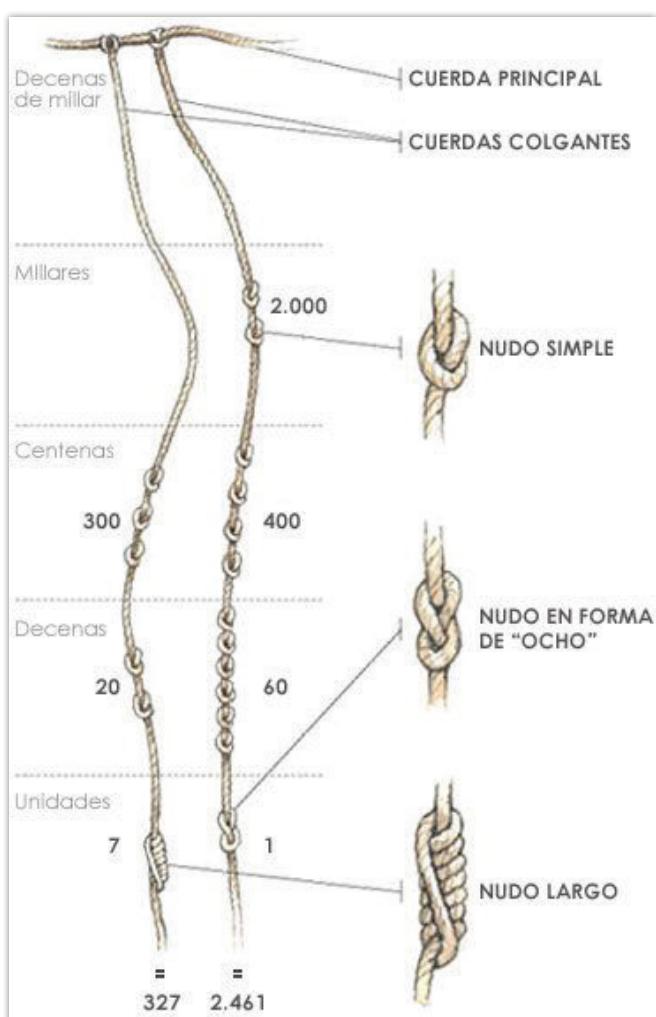

- Learn about this wiki
- Check out the recent changes
- View the [site policies](#)
- Download an XML dump of the wiki's content
- Discuss the wiki on the [community portal's talk page](#)

The screenshot shows the Hales website's homepage. At the top, there is a banner with a florist working on a large arrangement of white and pink flowers. The text on the banner reads: "Frische Blumen für jeden Geldbeutel." Below the banner is a dark green sidebar with the text: "Bei Hales arbeiten wir mit sorgfältig ausgewählten Gärtner:innen zusammen, von denen wir die frischesten Gewächshausbüumen, Wildblumen und saisonales Zierrgrün beziehen. Diese präsentieren wir in individuellen Keramik- und Glasgefäßen aus eigener Herstellung." The main content area features a section titled "Bestseller" with a call-to-action button "Blumen kaufen". Below this, there is a grid of three flower arrangements: Gesteck Fantin, Van Aelst-Strauß, and Gesteck Hiroshige, each with its price: 75,00 €. Further down, there is a section titled "Feiertage & besondere" with a decorative image of fallen petals and leaves. The Hales logo is at the bottom left, and a heart icon is at the bottom right.

Mach die ersten Schritte mit Squarespace

Wie erstelle ich eine Webseite?

1. Wähle ein Template und starte eine kostenlose Probephase.
2. Hole dir einen kostenlosen benutzerdefinierten Domainnamen für das erste Jahr deines Website-Jahresabos.
3. Verwende unseren Website-BUILDER, um deinen eigenen Text und deine Fotos hinzuzufügen.
4. Passe die Website mit Hunderten von Schriftarten, Farben und Agenturbildern an deine Marke an.
5. Du hast kein Logo? Erstelle eines mit unserem [Online-Tool](#).
6. Veröffentliche deine Website und bewirb sie mit Social-Media- und [E-Mail-Marketing](#).

So verkaufst du online

Wie erstelle ich einen Blog?

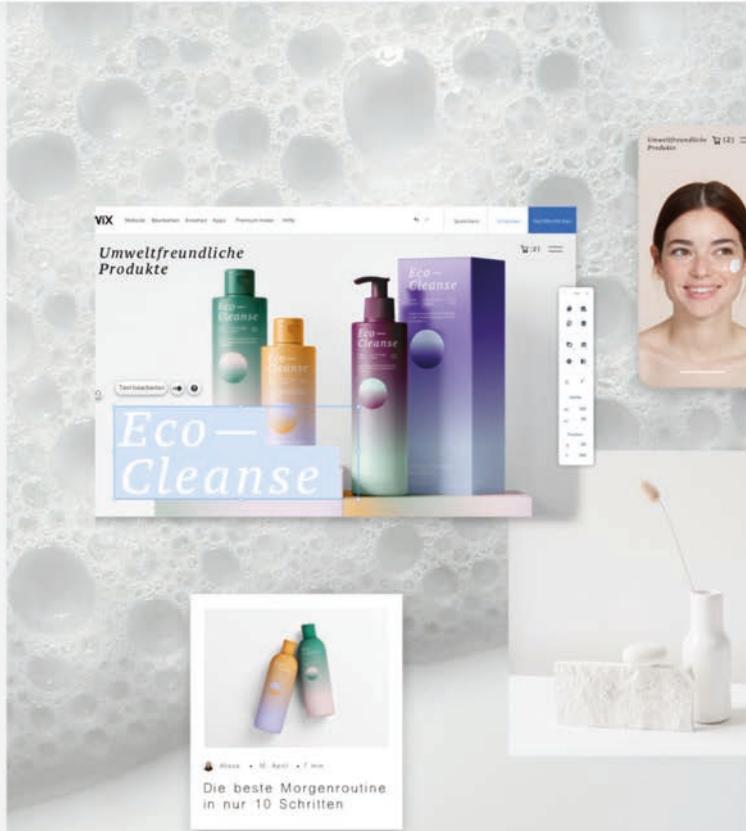

<https://de.squarespace.com/>

WIX Website ▾ Business ▾ Ressourcen ▾ Preise Support | Mehr ▾ [Anmelden](#)

Deine Website Design-Komplettlösung

Mit den intuitiven Technologien von Wix und den integrierten Funktionen, hast du jeden Designspielraum, um eine Website zu erstellen, auf die du stolz sein kannst.

[Jetzt starten](#)

The screenshot shows the Wix website builder interface. At the top, there's a navigation bar with links for 'Website', 'Business', 'Ressourcen', 'Preise', 'Support', and 'Mehr'. On the right side of the header is a 'Anmelden' button. The main content area features a large, bold title 'Deine Website Design-Komplettlösung'. Below the title, there's a paragraph of text: 'Mit den intuitiven Technologien von Wix und den integrierten Funktionen, hast du jeden Designspielraum, um eine Website zu erstellen, auf die du stolz sein kannst.' To the left of the main text is a black button with white text that says 'Jetzt starten'. The central part of the screenshot displays a live preview of a website. The preview shows a skincare product line named 'Eco-Cleanse' with several bottles of different sizes and colors (green, orange, purple). A woman's face is shown smiling on the right side of the preview. The background of the preview is a light, bubbly texture. At the bottom of the preview, there's a smaller image of two bottles and some text: 'Die beste Morgenroutine in nur 10 Schritten'. The overall layout is clean and modern, designed to showcase the ease and functionality of the Wix website builder.
